

# Session 2

## Interactors and Interactables

**Is there anything missing from the Session 1 Solar System Experience? What would be a good way to improve it?**

# Instructor(s)

**Instructor Name**  
Instructor Title  
Instructor Company

**TA Name**  
TA Title  
TA Company

# Session Goals

In this session, you'll:

- Create a **Capstone Project Design Brief**
- Identify different **Input Modes** and **Interactions** in VR
- Utilize and Customize **Interactable Events**

# Today's Agenda

## Capstone Project Design Overview

*Create a Design Brief*

## VR Controller and input overview

*Customize Select and Activate usage with XR Interaction Toolkit*

## Interactor Types

*Configure Interactor parameters*

## Interactable States

*Use Interactable States to show when an object is selectable by a user*

## Activity 2: Capstone Kickoff and Creating Interactions

# Example Capstone Projects

EXCITEMENT

Unite  
Copenhagen  
2019

# Capstone Projects

**What?** What goal is your VR project trying to accomplish?

**Who?** Who is your target audience?

**How?** What kind of actions can your users perform in your application?

# Design your Capstone Project

1. Download the Design Brief
2. Create a document and answer these three questions:
  - What goal is my VR Project trying to accomplish?
  - Who is the target audience of this Project?
  - What kinds of actions can users perform in this project?

What? What goal is your VR project trying to accomplish?
Who? Who is your target audience?
How? What kind of actions can your users perform in your application?

---

! Add reference photos or design inspiration to your document

# VR Controllers and Input

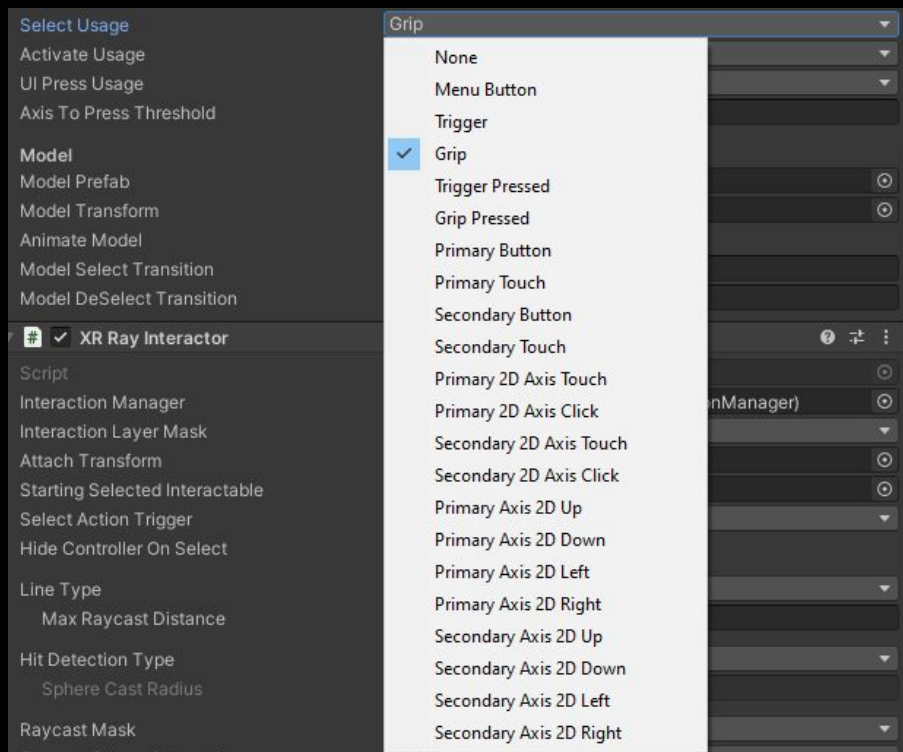

# XR Interaction with the XR Controller Script

## Three interaction Usage Types:

Select Usage

Activate Usage

UI Press Usage

# XR Input Mechanisms

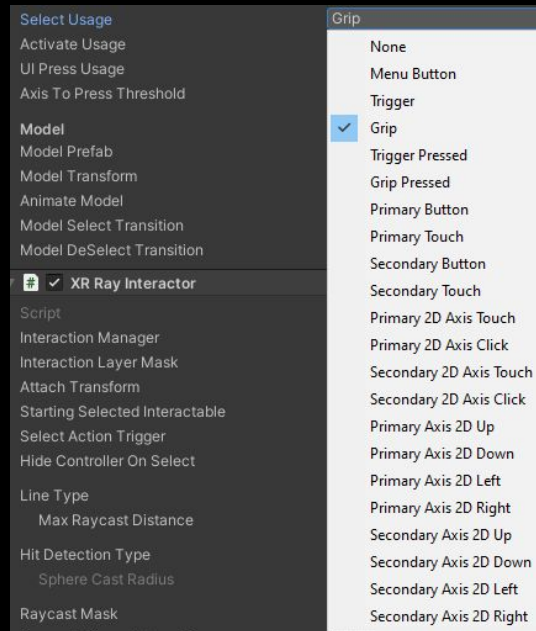

XR Interaction Debugger					
Input Devices		Interactables		Interactors	
Devices					
Name	Role	Type	Value		
▼ Devices					
▼ HTC V2-XD/XE S/N LHB-! TrackingReference					
DevicePosition		UnityEngine.Vector3	(1.4, 0.8, 0.1)		
DeviceRotation		UnityEngine.Quaternion	(0.0, -0.6, 0.0, 0.8)		
DeviceVelocity		UnityEngine.Vector3	(0.0, 0.0, 0.0)		
DeviceAngularVelocity		UnityEngine.Vector3	(0.0, 0.0, 0.0)		
TrackingState		System.UInt32	3		
Interactors					
Name	Type	Hover Active	Select Active	Hover Interactab	Select Interactat
▼ XR Interaction Mana					
LeftHand-BaseCc	XRDirectInter	True	False		
RightDoor-Sockel	XRSocketInte	True	True	RightDoor-Intera	
RightHand-BaseC	XRRayInterac	True	False		
Interactables					
Name	Type	Layer Mask	Colliders	Hover	Select
▼ XR Interaction					
RightDoor-I	XRGrabInteract	-1	RightDoor-Inter	False	True
TeleportAnc	TeleportationAr	-2147483648	TeleportAnchor	False	False
Teleportatic	TeleportationAr	-2147483648	Teleportation A	False	False

# Customize the XR Controller

1. Create a new scene and add a ground plane and a cube primitive
2. Create and configure a Grab Interactable component on the cube
3. Add an XR Rig and set your preferences for Select and Activate Usage on the XR Controller Scripts

! Experiment with the other inputs in the usage dropdown - what buttons do they map to on your controller?

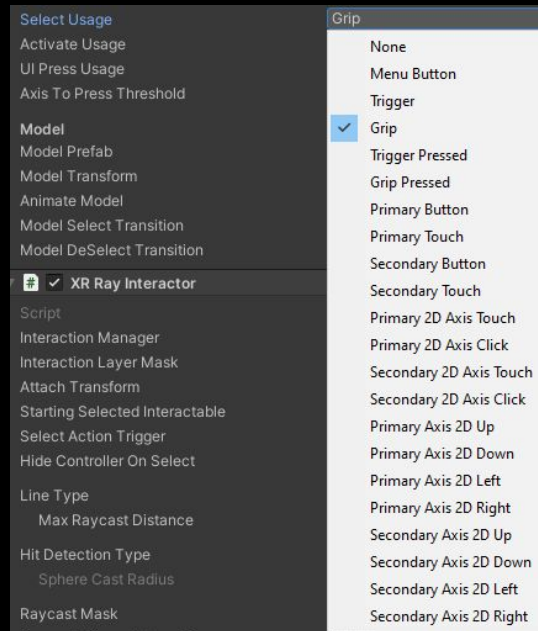

# Customize the XR Controller

1. Create a new scene and add a ground plane and a cube primitive
2. Create and configure a Grab Interactable component on the cube
3. Add an XR Rig and set your preferences for Select and Activate Usage on the XR Controller Scripts

! Experiment with the other inputs in the usage dropdown - what buttons do they map to on your controller?

# Interactor Types

Ray Interactors

Direct Interactors

Socket Interactors

# Ray Interactor Parameters

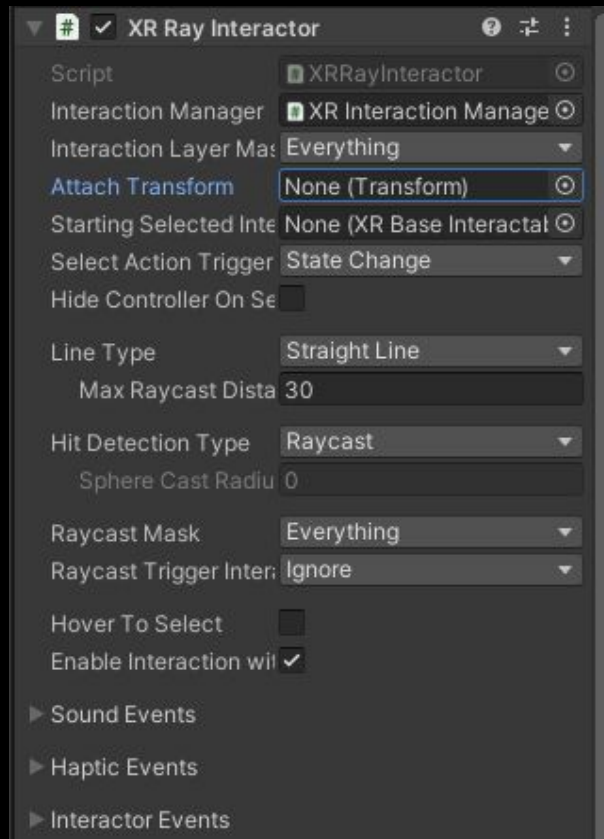

Toggle Select vs Hold

Raycast Map

Line Type

XR Interactor Line Visual

Raycast

# Configuring Basic Interactors

1. Decide whether you want Direct or Ray Interactors to be the main mode of interaction in your project
2. Create Direct Interactors and set them to Active/Inactive depending on your main mode of interaction
3. Configure the parameters of the Ray & Direct Interactor Components to your preference

---

! Think about how you'd like the controllers and input to function in your Capstone Project. Feel free to make additional notes in your Design Brief

# Configuring Basic Interactors

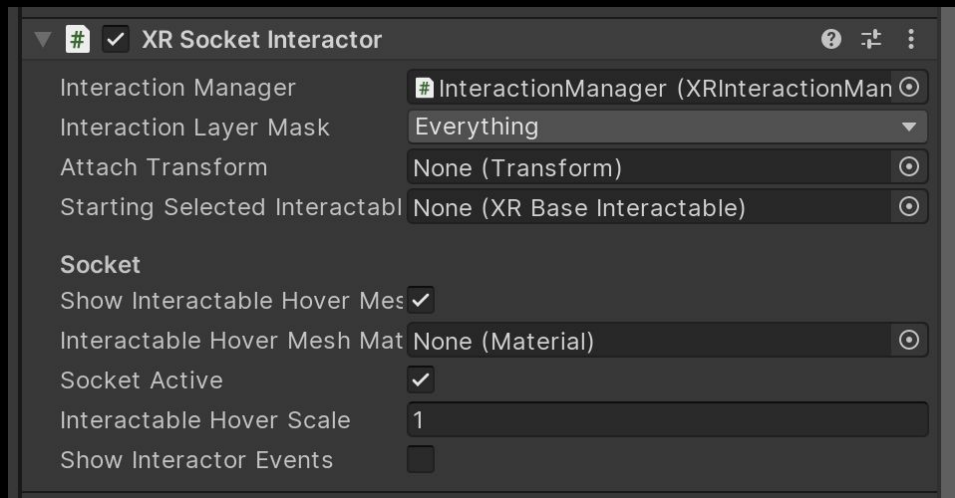

1. Decide whether you want Direct or Ray Interactors to be the main mode of interaction in your project
2. Create Direct Interactors and set them to Active/Inactive depending on your main mode of interaction
3. Configure the parameters of the Ray & Direct Interactor Components to your preference

# XR Socket Interactors

# Using XR Tint Interactable Visual

# Configuring Socket Interactors

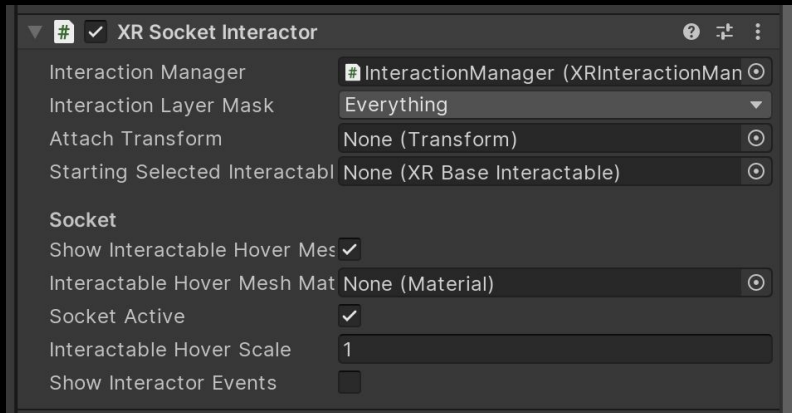

1. Create and configure a Socket Interactor in your project
2. Use XR Tint Interactable Visual and Hover Materials to indicate when objects can be picked up or socketed

# Configuring Socket Interactors

1. Create and configure a Socket Interactor in your project
2. Use XR Tint Interactable Visual and Hover Materials to indicate when objects can be picked up or socketed

# Activity Session 2

## Capstone Project Kickoff

# Activity 2 Goals

1. **Attend Activity 2 Office Hours** to review your capstone project brief
  - a. Add any additional notes to your design brief, such as interaction mockups or quick sketches
  
1. Set up your Main scene environment using assets provided in the project
  - b. Create a few grabbable objects and sockets

Feel free to ask questions!

# Thank you.
